**Your Role in Brief:**

As a Back-end Java Spring Boot Developer at maids.cc, you will be responsible for designing, developing, and maintaining robust, scalable applications using Java and the Spring Boot framework. You will collaborate with cross-functional teams to deliver high-quality software solutions that meet our needs.

**What You'll Do:**

- Design, develop, and maintain efficient, reusable, and reliable Java code.
- Translate application requirements into high-quality software solutions using Spring Boot.
- Collaborate with team members and stakeholders to gather and understand project requirements.
- Perform unit testing and debugging to ensure software meets specifications.
- Participate in code reviews and provide constructive feedback to peers.
- Troubleshoot, debug, and upgrade existing systems as needed.
- Stay updated with emerging technologies and best practices in software development.
- Document software specifications and provide support for technical documentation.

**What you'll bring along:**

<u>**Technical Skills:**</u>
- Proficiency in Java programming language and hands-on experience with Spring Boot framework.
- Solid understanding of software development principles, object-oriented design, and design patterns.
- Experience with RESTful APIs, microservices architecture, and web services.
- Familiarity with relational databases (e.g., MySQL, PostgreSQL) and ORM frameworks (e.g., Hibernate).
- Experience with version control systems (e.g., Git) and CI/CD pipelines is a plus.

<u>**Soft Skills:**</u>
- Excellent problem-solving abilities and a proactive approach to addressing challenges.
- Strong communication skills to effectively collaborate with team members and stakeholders.
- Adaptability to work in a fast-paced environment and manage multiple tasks simultaneously.
- A collaborative mindset with the ability to work well within a team as well as independently.
- Attention to detail and a commitment to delivering high-quality work within deadlines.
- Ability to learn new technologies quickly and apply them to projects efficiently.

**Education and Experience:**
- Bachelor's degree in Computer Science, Engineering, or related field (or equivalent work experience).
- Proven experience as a Spring Boot developer or similar role.
